Re: GOI-IES Scholarship Call

Dear Sir, Madam,

With this letter I would hereby like to express my motivation to study Master degree Programme in Data Science offered by Trinity College in Dublin, Ireland under GOI-IES Scholarship Call.

I strongly believe that Ireland would be an excellent destination to pursue a master's degree in Data Science and Data Analytics for graduates who have technical or mathematical problem-solving skills because the curriculum is very well-designed and as per industry requirements.

In my opinion a qualifying University degree along with certifications of the basic technology adopted at the industrial level will be the key criteria for me to become a professional data scientist and data analyst. Now, Ireland is widely recognized as IT-hub and there is an increasing demand for graduates in Data Analytics. Therefore, I expect to have a lot of career opportunities to improve my expertise in data analytics and data science on this program.

A master degree course in Data Analytics and Data Science would be an excellent learning platform to master business and data understanding. By studying data analytics in Ireland, I will be equipped with the required skills that can support me to become professional data scientist and data analyst in the long run. For example, I will be able to solve complex scientific problems and analyse large data sets using a range of theoretical tools.

Because of my education background in information technology, I am good at computing and mathematics in general and I believe the master in data analytics in Ireland is the right choice for me. My future career is being a lecturer with data science and data analytics specialization, so if I have the skills that match with industrial requirements, I will be able to create professionals that match to market needs.

If being awarded with scholarship I can assure you that I will do my best to meet my obligations as scholarship beneficiary. Furthermore, I would be happy to spread word of mouth, about my experiences from participation in the program, and possibly attract more qualified candidates in the future. Through increasing the number of students from Asia Pacific countries and improving academic mobility between Ireland and target countries, Ireland can achieve the targets in Irish Educated: Globally Connected.

Thank you for your time and consideration. I am waiting for your response.

Yours faithfully,

Marc Smith
